Crucible

A design language for Himem — an Apple-native base, a warm literary voice, and Senior-grade layout. This document is the product reference: foundations, components, patterns, guidelines, and applied surfaces.

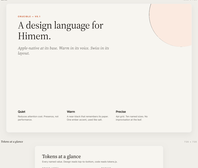
A.P. Lachlander · Jack Lander · Claude, Opus

SECTION 01

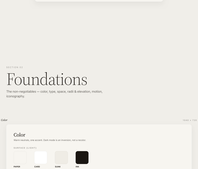
Intro

The tagline, the token summary — everything compressed to two pages.

Cover



Token at a glance

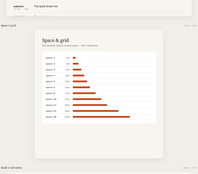


SECTION 02

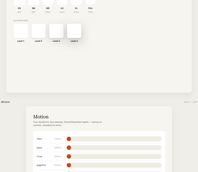
Foundations

The non-negotiables — color, type, space, radii & elevation, motion, iconography.

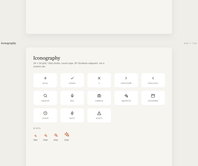
Color



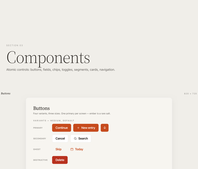
Typography



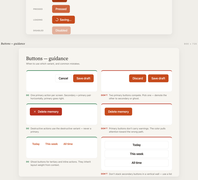
Space & grid



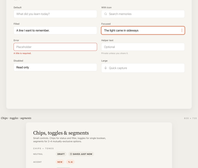
Radii & elevation



Motion



Iconography

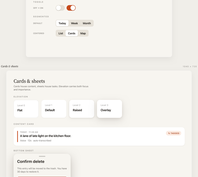


SECTION 03

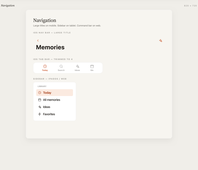
Components

Atomic controls: buttons, fields, chips, toggles, segments, cards, navigation.

Buttons



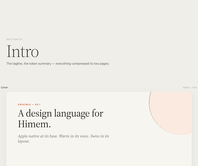
Buttons — guidance



Fields

Chips · toggles · segments

Cards & sheets



Navigation

SECTION 04

Complex

Composed patterns: lists, cards, command palette, data packet.

Lists

Tables TOKEN + TYP

Tables

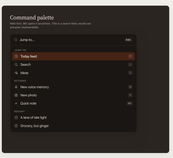
For details, like height 64. First column bolded. Zebra is implied by rhythm, not fill.

TITLE	AUTHOR	DATE	TIME
A lane of late light	Valse · 12s	Today	11:18 pm
Grocery, but ginger	Text	Yesterday	8:04 pm
Bridge conversation	Voice · 3:41	Nov 14	3:10 pm
On patience	Text	Nov 12	8:22 am
How coffee smells	Voice · 23s	Nov 10	7:40 am

Command palette WIDE + TOK

Command palette

Keyboard-first, grouped, scrollable. Title is a search field, results are grouped, keyboard-navigable.



Date picker TYP + TOK

Date picker

Calendar grid. Today is a ring, selected is a filled circle. Weekends muted.

SECTION 05

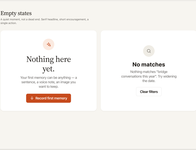
Patterns

Moments that test the system: empty, loading, error, confirmation.

Empty states TYPE + TOK

Empty states

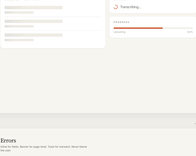
A quiet moment, not a dead end. Soft headline, short encouragement, a single action.



Loading TOKE + TOK

Loading

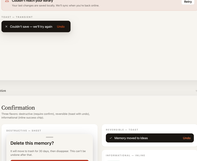
Skeleton for screens, spinner for pending actions, progress for known-length tasks.



Errors TOKE + TYP

Errors

Inline, not modal. Name the page/part. Tone0 for transient. Never blame the user.



Confirmation TOKE + TYP

Confirmation

Three flavors: destructive (require confirm), reversible (toast with undo), intentional (hold to confirm).

SECTION 06

Guidelines

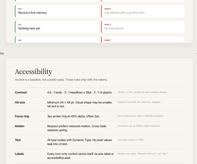
Voice, accessibility — the rules the tokens don't say out loud.

Voice TYPE + VOI

Voice

How the product speaks. Read a line aloud. If it sounds like a notification from a company, revise it.

Quiet over loud	A small true thing beats a big vague thing.
Specific over clever	Name the real object. "12 seconds" not "a moment".
Warm over neutral	We write like a thoughtful friend — not a product.
Never blame	If something fails, we own it. "We couldn't reach…" — not "you are offline".



Accessibility TYPE + SCA

Accessibility

Access is dignity, not a polish pass. These rules ship with the tokens.

Contrast	AA · Tiny3 · 3 · Headline · Sub · 2 · Tyl glyphs.
Hit size	Minimum 44 × 44 pt. Visual shape may be smaller, hit area is not.
Focus ring	2px solid ring at 40% alpha, offset 2px.
Motion	Respect prefers-reduced-motion. Cross-fade instead of slide.
Text	Minimum readable size 12 pt. No pinch-zoom lock, ever.
Labels	Every icon-only control names itself as a verb or a noun.
Canvas	Status is never color alone. Pair with icon + label.
Screen reader	Group labels follow reading order. Decorative elements are hidden.

SECTION 07

Applied

Tokens translated into real product surfaces — iOS Today, Memory detail, Search (start), Web app shell.

iOS — Today 390 × 780

iOS — Memory detail 390 × 780

iOS — Search (left) 390 × 780

Web — App shell 1440 × 900
